

About Us

INDUSTRY EXPERT IN AUDIO VISUAL AND INTERNET OF THINGS

Everything we do is to enable your business to achieve maximum productivity and profitability. It was true when ESCO opened in 2003 and it is just as true today. We prioritize what you need.

ESCO is a forward-looking company focused on products and bespoke solutions for your workspace and unified communication system. We have been a pioneer and market leader of the Audio Visual and IoT industry in Indonesia with exceptional products. Since then, we have designed, built, integrated, managed, and enabled space transformation to bring people together and spark success.

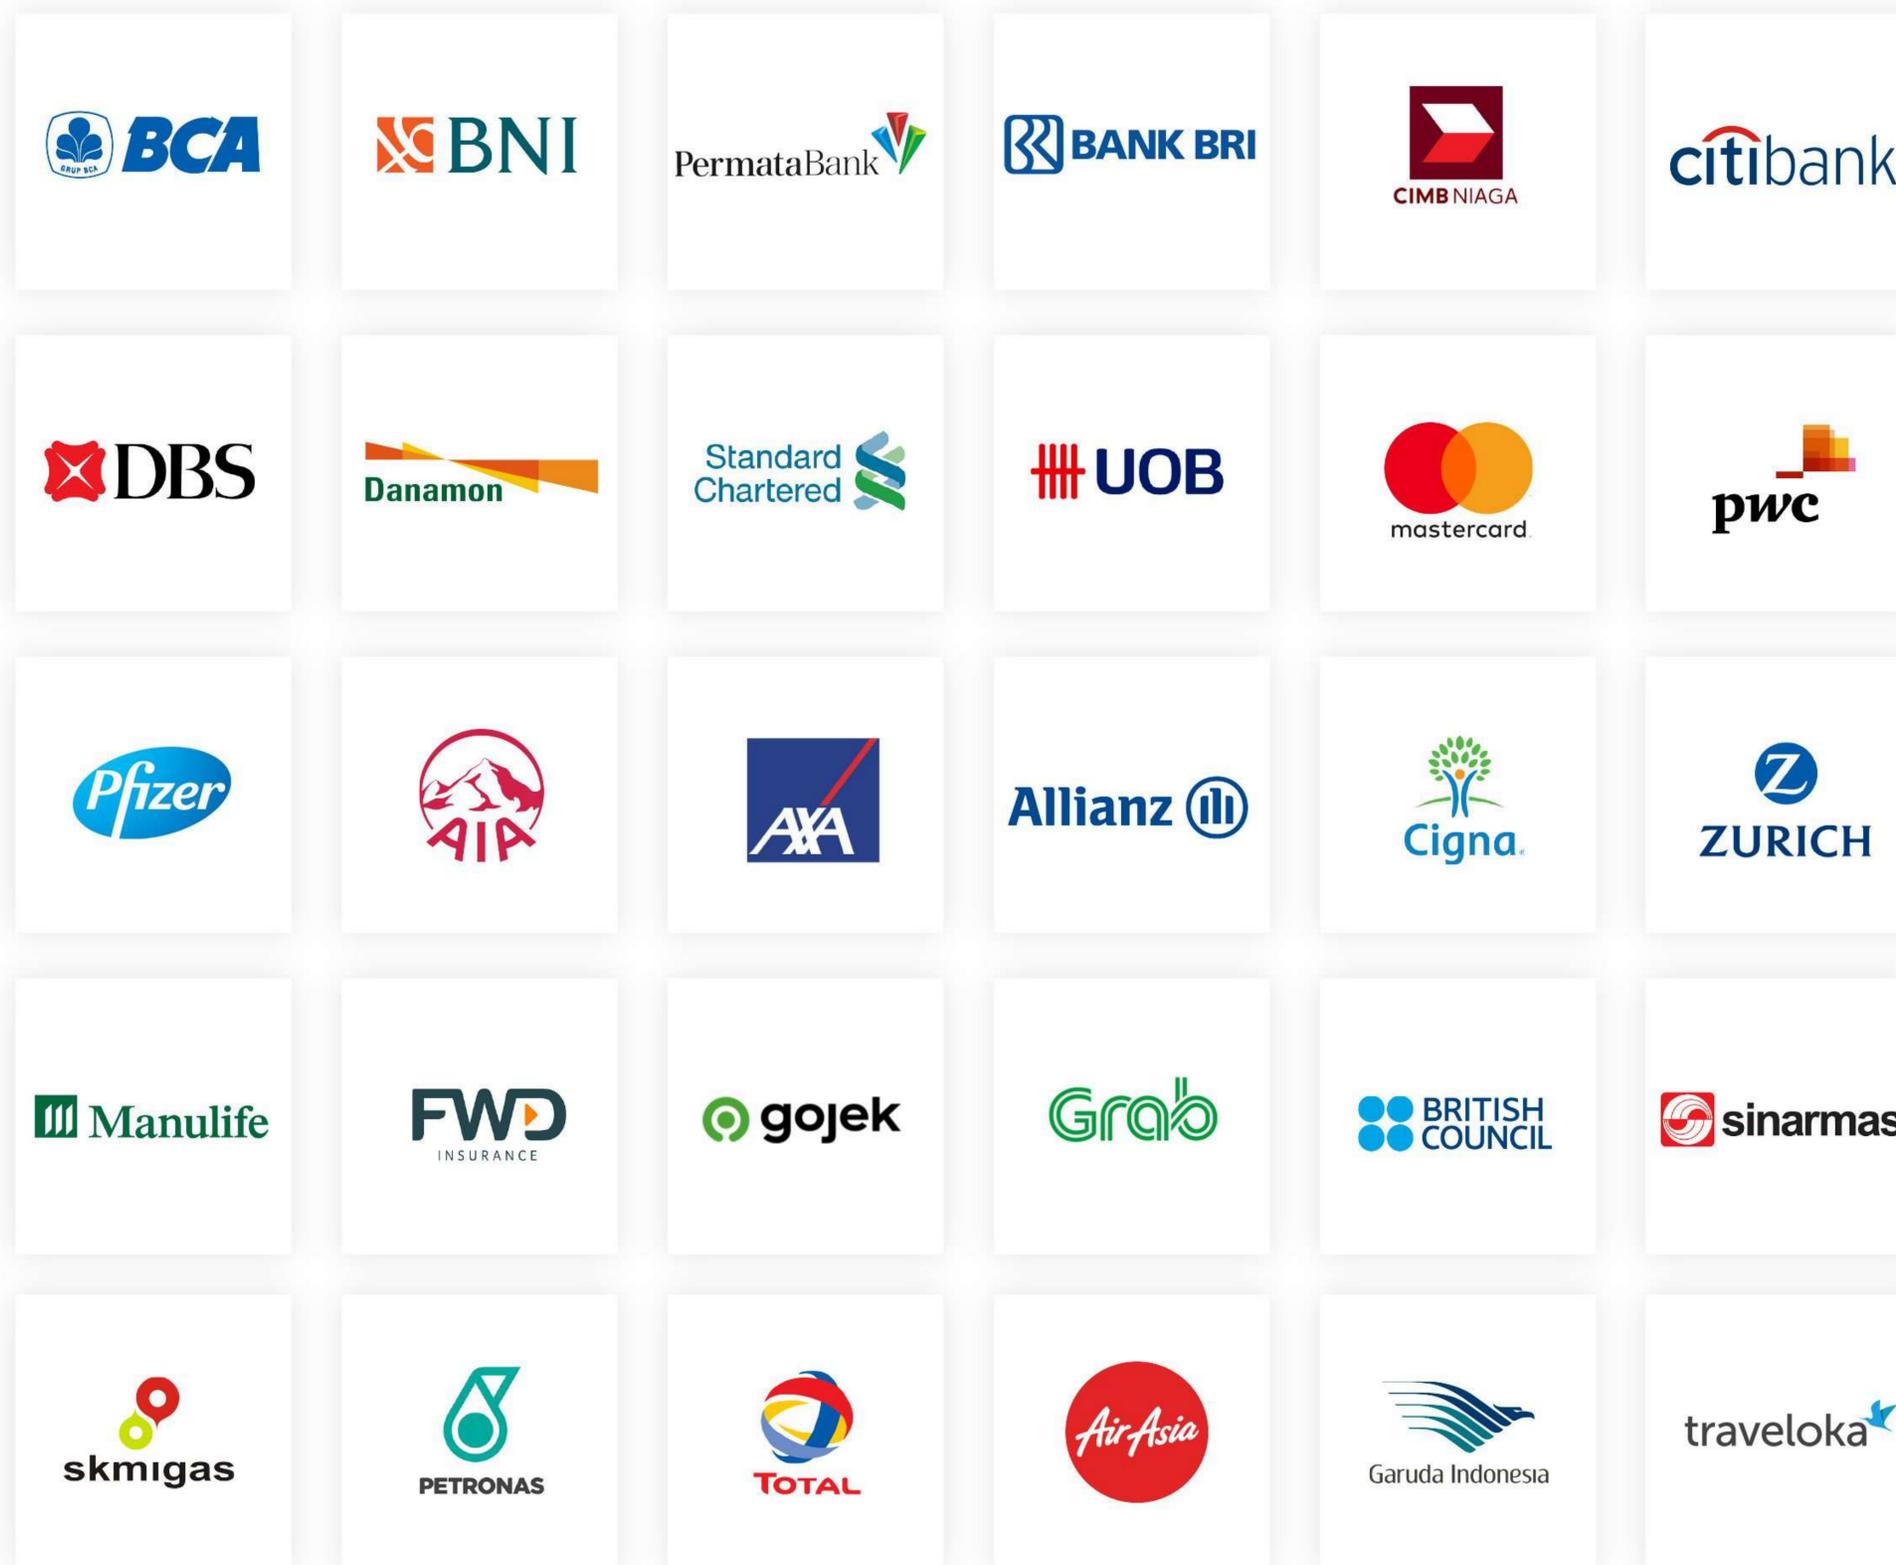

The spaces we worked on are Audio Visual system for huddle rooms, boardroom, meeting room, hotel ballrooms, large auditoriums, public venues, etc. Today, we are privileged to be the solution provider for many great companies in Indonesia, such as BCA, Google, Gojek, Grab, Traveloka, XL, Garuda, Hyatt, Raffles and a few hundreds more.

Having done so many solutions, we have realized that every single one is truly unique. Therefore, we pride ourselves on designing and building the most function-oriented Audio Visual technology for our customers in each proposal, considering budget constraints and futureproof necessities.

Our Room Solutions

You need AV collaboration solutions that are standardized, simplified, scalable, and serviceable so that staffs are engaged and perform at their best. ESCO help teams collaborate and share content in real-time, anytime, from anywhere using advanced conferencing, networked audio and video, and advanced visualization technologies.

Projection

ESCO has a wide range of the best projectors for business and education market. For instance, ultra-portable projector, high brightness projector, interactive projector, short throw projector and document camera. These projectors allow a wide variety of resolution, brightness, input and features to enrich your presentation experience. Rest assured, ESCO will quote the best price in the market.

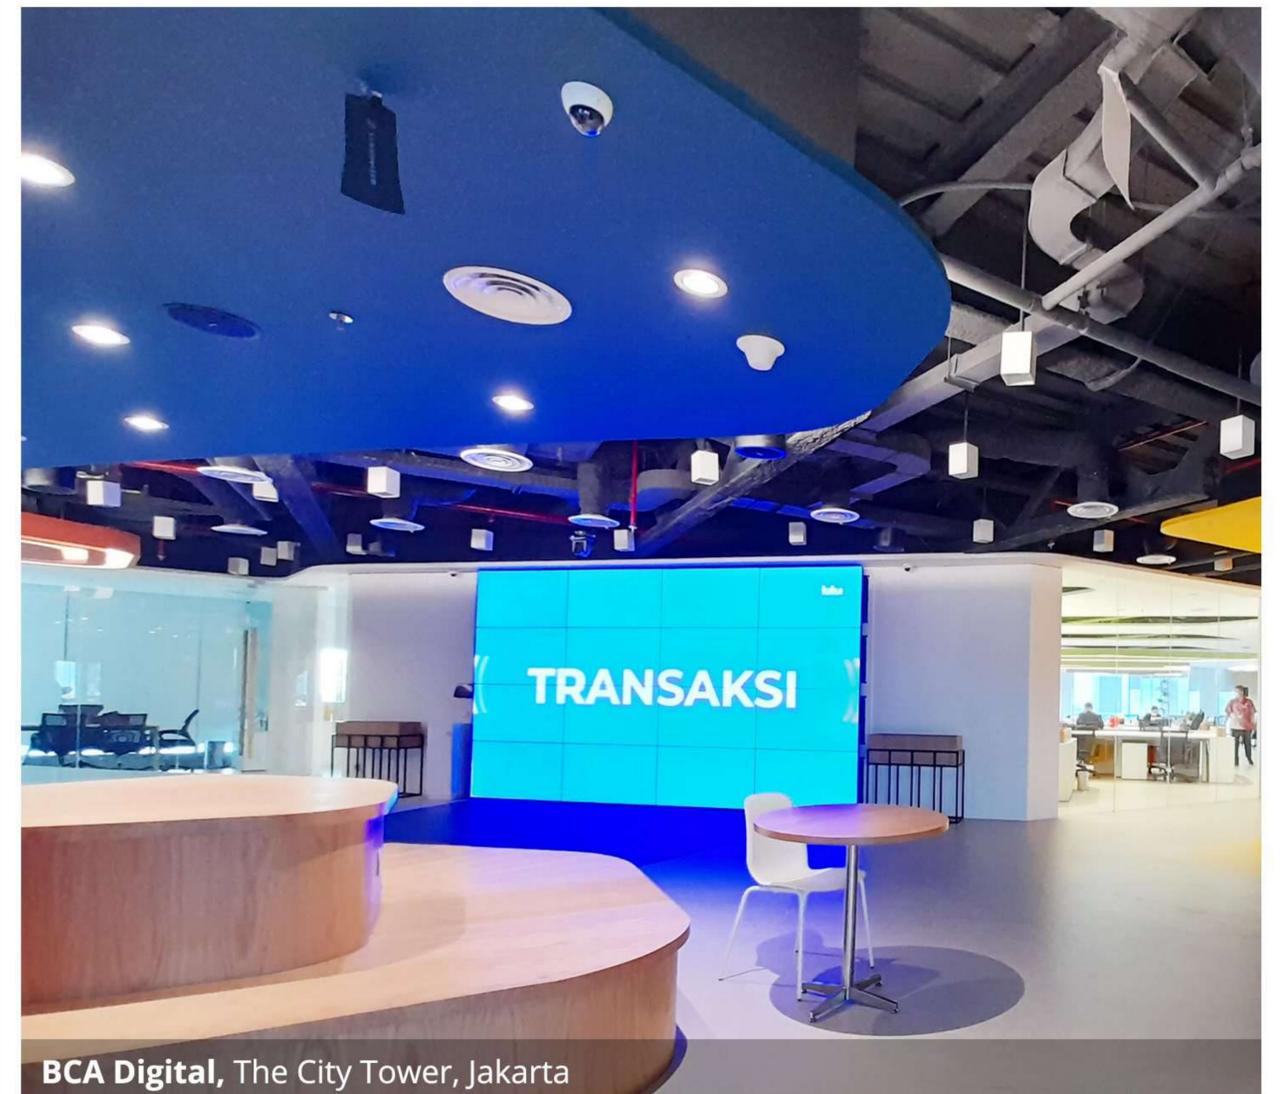

Professional Display

Modern workplaces require more versatile displays to improve productivity and ensure uninterrupted communication. Meeting attendees can share new contents and ideas on the main screen from multiple sources without delay. ESCO understands these needs and offers a complete line up of professional displays with stylish design from reputable brands.

Citibank, Plaza Senayan, Jakarta

BCA Digital, The City Tower, Jakarta

Video Wall

More businesses turn to video walls to enhance communication and serve as promotional tool in public spaces. Contents will be audience focused, interactive and can be synchronized from one location through network and cloud. Our non-glare panel evenly distributes light while improving colour uniformity to bring out the best in featured content that creates a true customer experience.

Ministerio Das Financas, East Timor

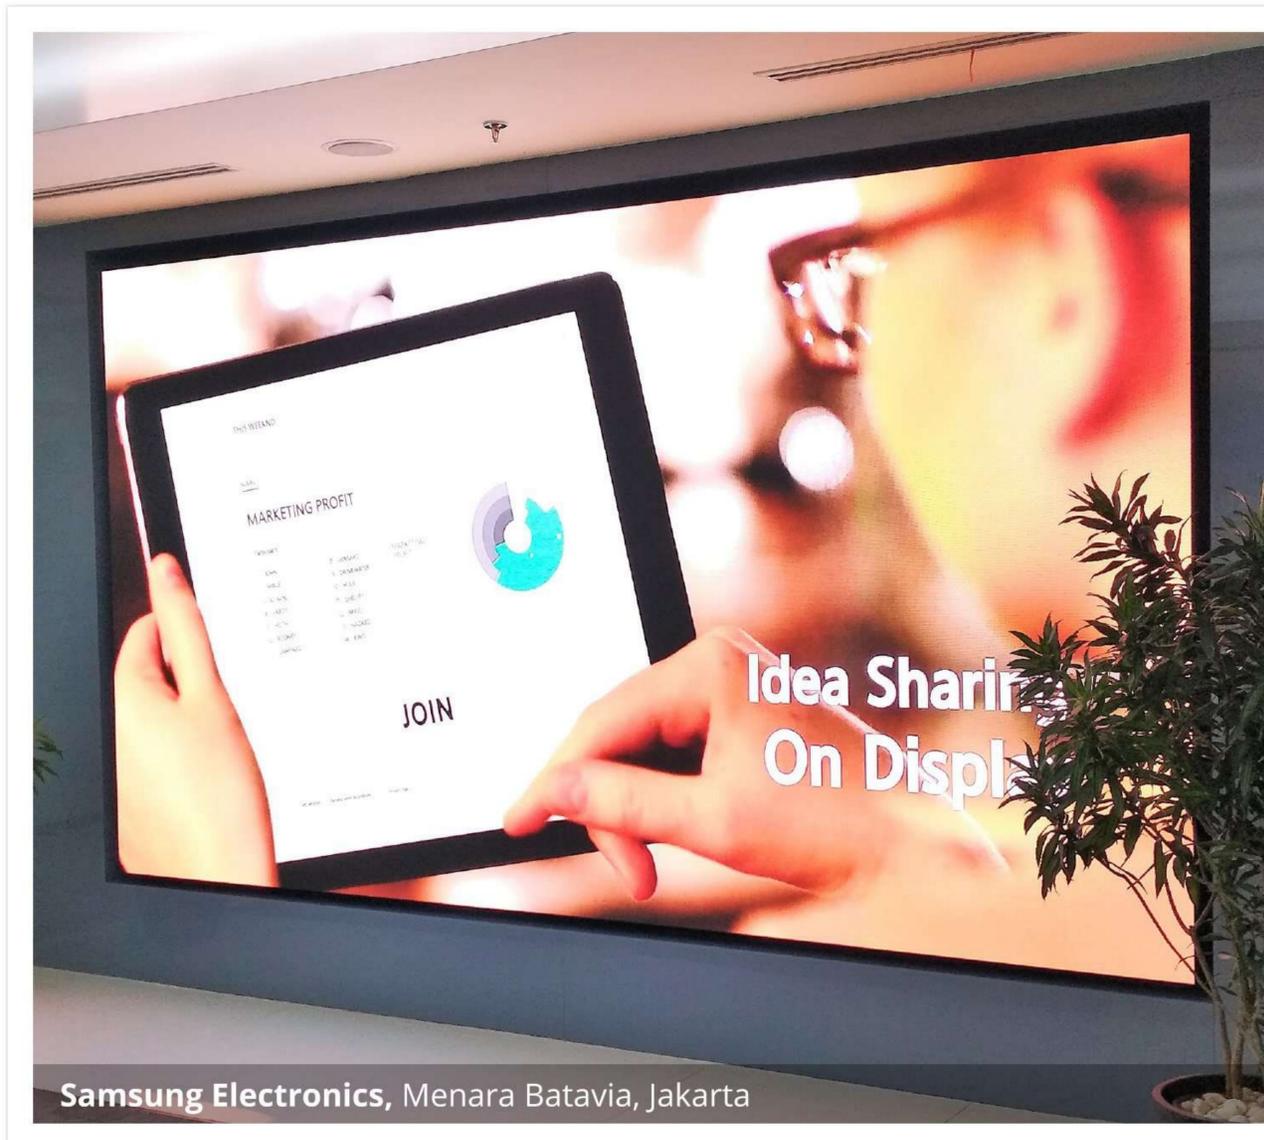

Unilever, Green Office Park, Tangerang

Air Asia, Terminal A / 1-A, Tangerang

Videotron

LED Video Wall comprises of multiple panels connected to form a seamless surface, bezel free and can adapt to practically any indoor and outdoor environment. LED Video Wall comes with various pixel pitch configurations, versatile mounting systems beyond the normal 16:9 constraints and scalable to any size or shape. LED Video Wall is suitable for boardroom, town hall, auditorium, airport, control room to public display.

Digital Signage

Enliven visual message through impactful content with eye catching clarity for indoor and outdoor. ESCO digital signage solution allows for the creation, schedule, deploy content, remote management and distribution of content over high quality infrastructure around the clock without interruption. Our designers can help to create 2D and 3D interactive multimedia contents.

Interactive Board

Digital Whiteboard transforms ordinary places into modern collaboration spaces. It facilitates more impactful discussion, enhances collaboration and consolidates all ideas and suggestions in brainstorming sessions. These cutting-edge multi touch interactive displays enable multi-location communication and accommodate virtual participants as if they were present in the same room. Participants can keep the records of the meetings and save new ideas for later use. Meeting becomes smarter, faster and better.

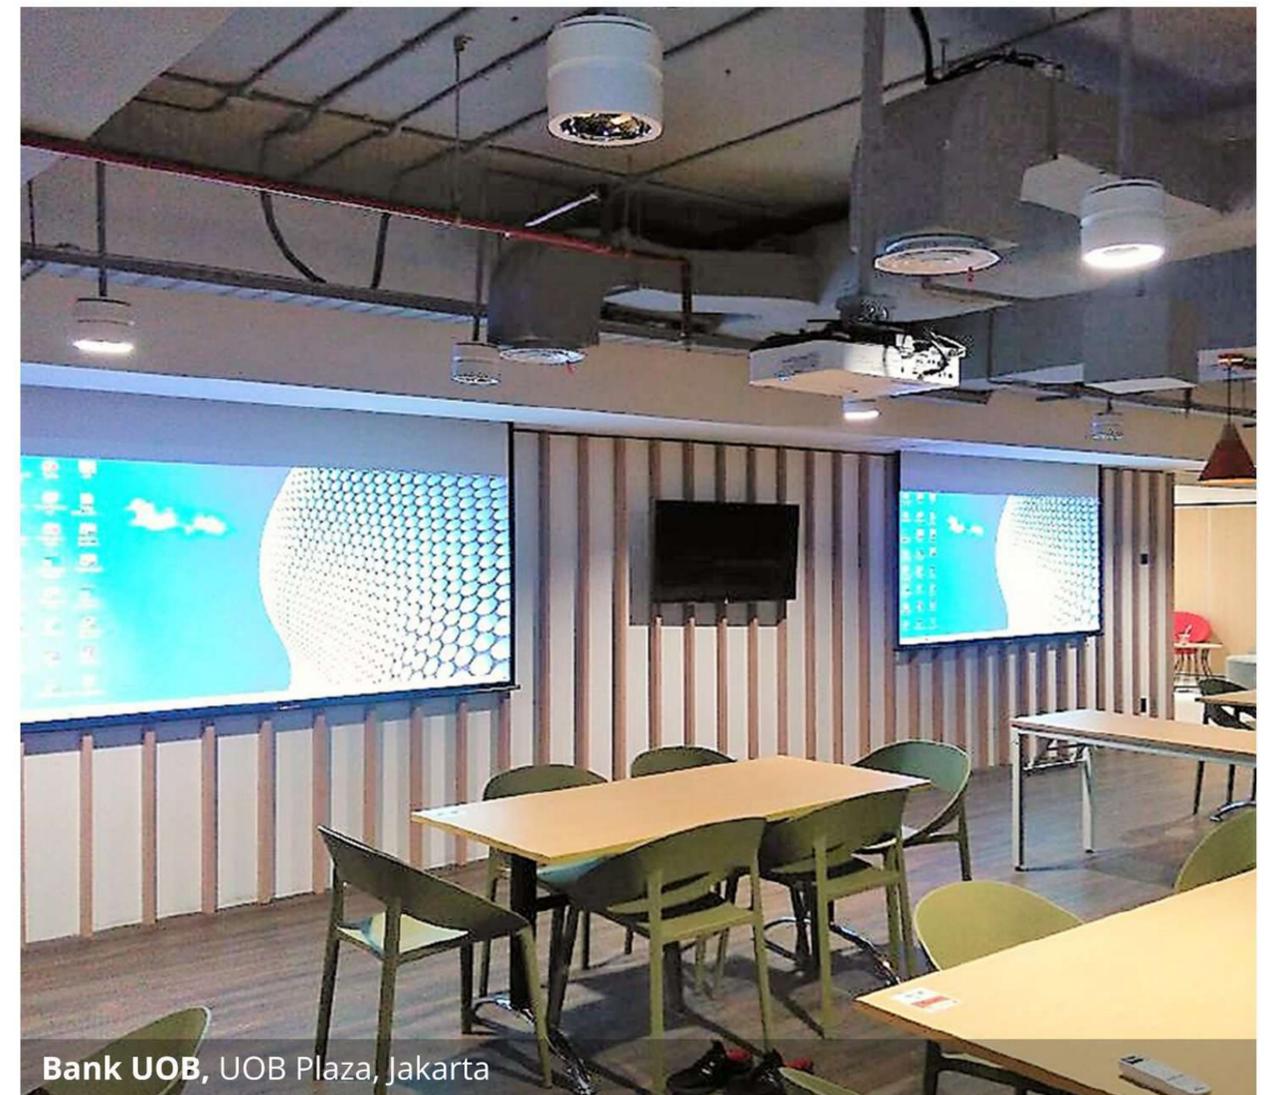

Wireless Presentation

Simply share your laptop or mobile device on presentation screen without installation, setup and messy cables. Transforming a meeting into a complete sharing experience with a single click. Frees everyone to share what's on their devices, on the same display, simultaneously. Let everyone take a more active part in every meeting.

Wireless Presentation

Simply share your laptop or mobile device on presentation screen without installation, setup and messy cables. Transforming a meeting into a complete sharing experience with a single click. Frees everyone to share what's on their devices, on the same display, simultaneously. Let everyone take a more active part in every meeting.

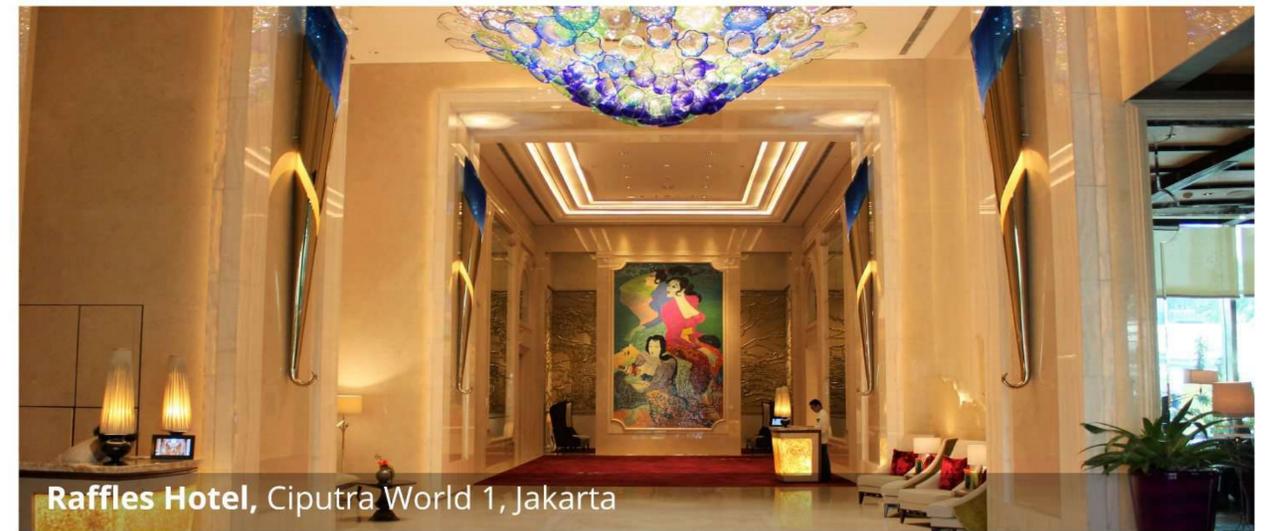

Sound System

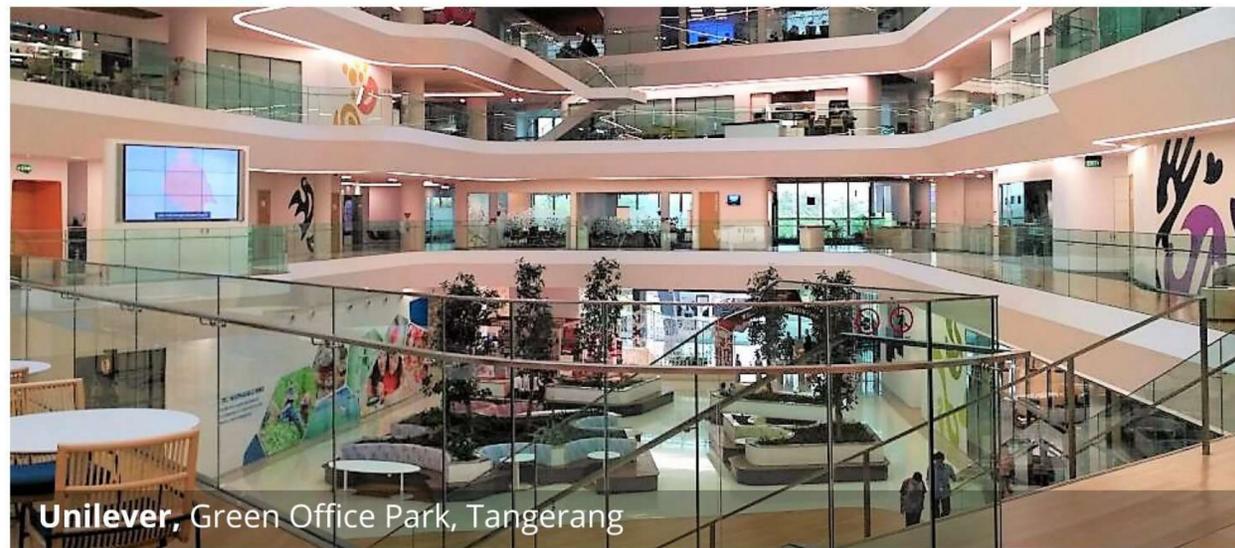

ESCO has demonstrated excellence in sound quality and reliability in many state-of-the-art auditoriums, hotels, retail shops, health clubs and conference rooms. Models are ranging from surface-mount, flush-ceiling, pendant and line array for both indoor and outdoor installed applications. ESCO maps out the sound coverage of each venue to ensure smooth and pleasant listening experience.

Unilever, Green Office Park, Tangerang

JLL, Indonesia Stock Exchange Building, Jakarta

Conference Microphone

Make sure your message gets across in large meeting rooms or conference rooms. Conduct meeting with attendees residing in other locations and foreign countries, telephone conference, press conference and many more applications. Advanced audio processing resulting in a face-to-face meeting experience. ESCO offers the ideal conference solution that ensure every word will reach the audience reliably and crystal clear.

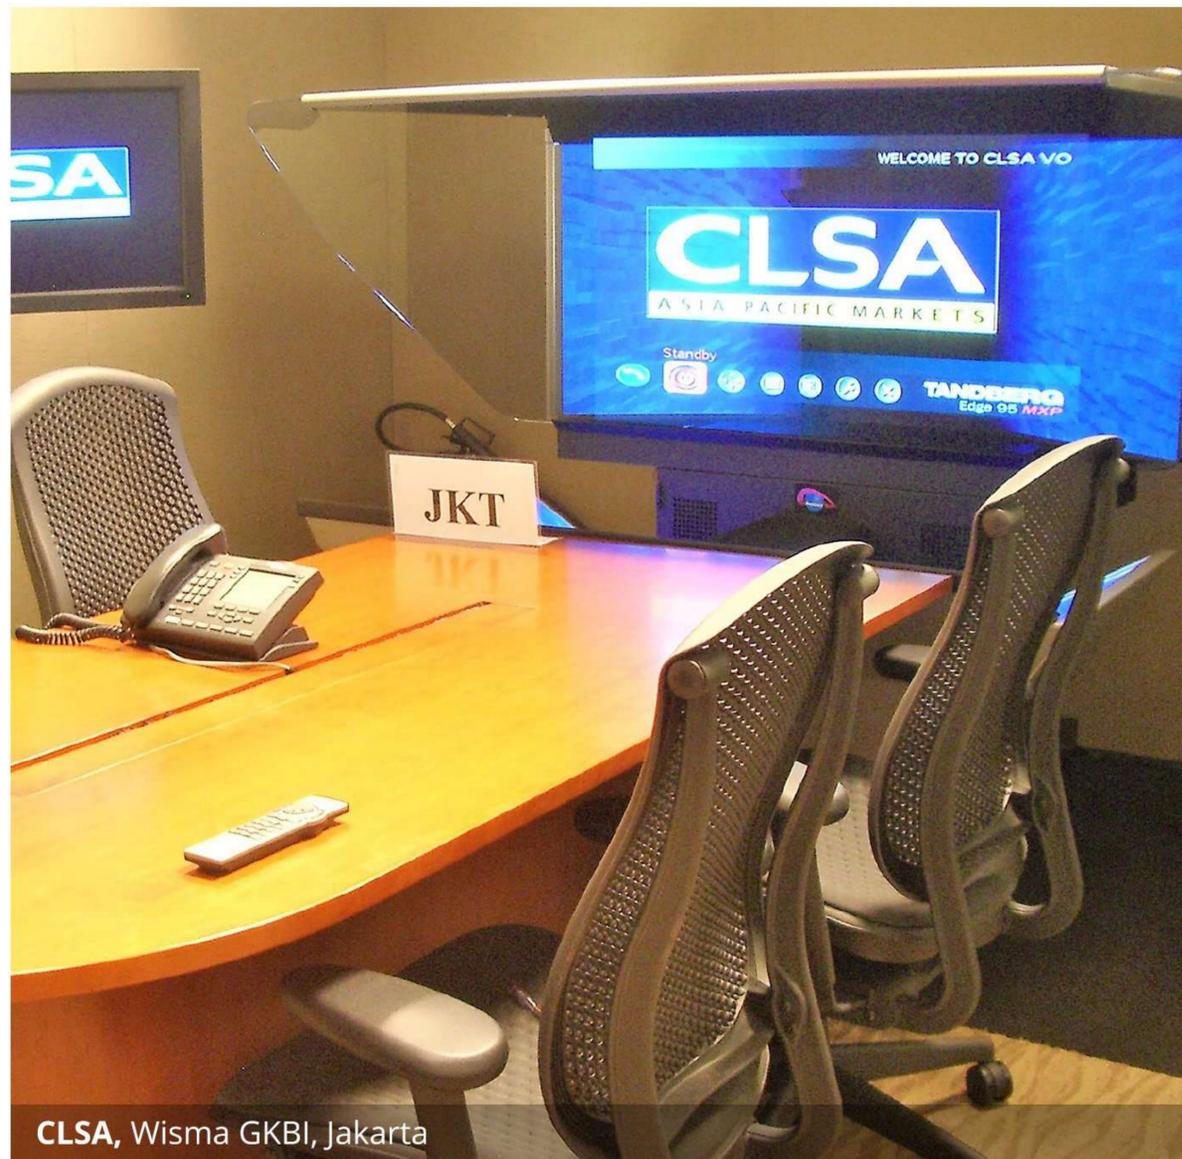

Audio and Video Conference

Audio and Video Conference increase work collaboration, save time, lower travel cost, improve communication, strengthen sense of community and relationship. Use for holding meetings, conduct trainings, negotiating business deals and interviewing job candidates. ESCO will recommend the most reliable and latest technology according to room size, usage requirement and budget.

Audio and Video Conference

Mastercard, Sentral Senayan I, Jakarta

Barclay, Barclay House, Jakarta

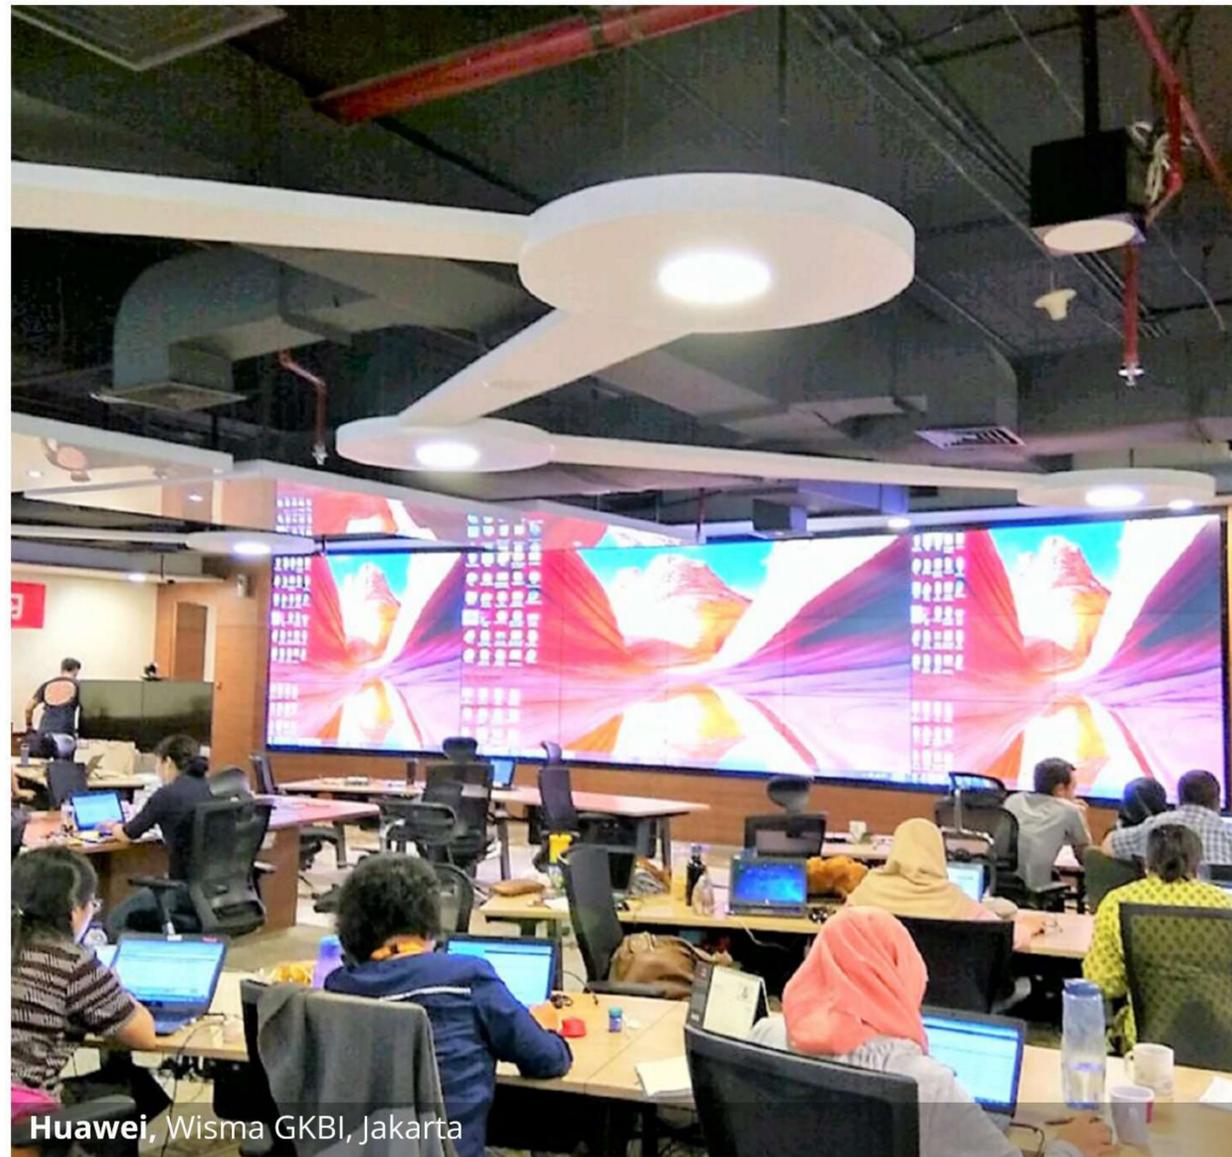

Internet of Things (IoT)

Seamlessly controls all electronic products including audio visual equipment so they can be monitored and managed from touch panel or wireless device from anywhere. Room participants can quickly start meeting and video conference by pressing preset button tailored to specific function. ESCO standardizes users' experience, so that everyone can easily operate the AV system without hesitation.

Command and Control Center

ESCO has the expertise in addressing the unique requirement of mission critical facilities such as network operation center, war room, emergency operation center, traffic control center, security monitoring system and call center. This 24/7/365 application requires complete visibility into all the network processes, streamline operations and enhance customer support.

Meeting Room

Meeting Room should be the hub of innovation and transformation for your company. It should provide open collaboration areas, huddle rooms and team meeting spaces equipped with interactive display, wireless content sharing, sound system, control system and conferencing technology.

Classroom and Training Center

Modern classroom and training centers enable teachers and students to interact in more engaging learning process. Educators will be able to improve collaboration and content sharing technology to showcase student work for instruction and comparison. Conferencing allows teachers to bring experts into the classroom for special lessons and records lectures for on-demand access.

Auditorium and Ballroom

Large venues demand networked AV technologies to distribute high-definition AV and centralized control over lighting, sound, projection and HVAC via touch-based monitor. Centralized management system reduces the complexity process of live events and making them more impressive and simpler to manage. Our sound engineers ensure evenly distributed sound along with effective noise control and vibration isolation.

Maintenance

Over the years, our team of experienced professional AV engineers are fully trained and have the knowledge to help our Clients needs in the direst situations. We work closely with our Customers to understand their needs and implement them on site.

Maintenance Services

Periodic preventive on-site visit to do health check on the Audio Visual equipment to protect our Clients initial investment.

Event Standby

During critical moments where there can be no errors, we help Our Clients by deploying one or two of our experienced professional AV engineers to help them setup and make sure that the Event runs smooth and flawless.

ESCO maintenance solutions ensure your Audio Visual and IoT hardware and software remain in top notch condition and ready to use at all time.

Post-Sale Maintenance

- Validity: 1 year after project handover.
- Cost: Free
- Coverage:
 - Onsite service and troubleshooting
 - Email and phone call support
 - 4 times a year preventive maintenance
 - Max 4 times a year engineer standby to support major event (user request)
 - Max 4 times a year onsite or phone call training on operation and basic maintenance (user request)
 - Onsite or phone call sales or technical consultation
 - Under warranty spare part replacement

Standard Maintenance Contract

- Validity: 1 year after post sale maintenance.
- Cost: Negotiable.
- Coverage:
 - Onsite service and troubleshooting
